

DASARI DEVI PRASANNA

Aspiring Software Engineer | Java · Full-Stack & AI/ML Development

Rajahmundry, India | prasannadasari006@gmail.com | +91 9701690259 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [CodeChef](#)

Professional Summary

Computer Science undergraduate (CGPA 8.82) with hands-on experience building AI/ML and full-stack applications through two internships and two end-to-end projects. Proficient in Java, Python, and core data structures & algorithms, with 400+ problems solved across competitive coding platforms. Seeking a Software Engineer internship to apply strong problem-solving skills to scalable, real-world software solutions.

Technical Skills

Programming Languages: Python, Java, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming

Web Development: HTML, CSS, JavaScript, Flask

AI/ML: TensorFlow, Keras, Transfer Learning (MobileNetV2), OCR, Gemini API

Databases: PostgreSQL, SQL, Firebase Firestore

Tools & Platforms: Git, GitHub, VS Code, Vercel

Internship Experience

AI/ML Intern | SmartBridge

2025

- Built HematoVision, a deep learning model for automated blood cell classification, applying TensorFlow and transfer learning techniques to improve prediction accuracy.
- Trained and fine-tuned a MobileNetV2-based image classifier, then packaged it into a deployable pipeline for real-time inference.

Web Development Intern | TechSonix Solutions

2025

- Completed a 4-week internship under the TechSonix Employability Program, building hands-on web development skills.
- Applied front-end and web development fundamentals to real project work, strengthening practical coding and problem-solving ability.

Projects

HematoVision — Blood Cell Classification using Transfer Learning

Python · TensorFlow · Keras · MobileNetV2 · Flask · HTML/CSS/JavaScript | github.com/Hematovision

- Engineered a deep learning pipeline that classifies blood cell images using transfer learning on a pretrained MobileNetV2 architecture.
- Developed and deployed a Flask web application that serves real-time predictions through a simple upload-and-classify interface.

MediTips — AI Medicine Recognition & Healthcare Assistant

HTML · CSS · JavaScript · Firebase Firestore · Gemini API · OCR · Vercel | github.com/meditips

- Designed and built an AI-powered web app that identifies medicines from photos using OCR and retrieves details via the Gemini API.
- Integrated Firebase Firestore for real-time data storage and implemented a responsive interface supporting instant medicine search.

Education

B.Tech in Computer Science and Engineering | Aditya College of Engineering and Technology

2023 – 2027

CGPA: 8.82 / 10

Higher Secondary Education (MPC) | Prathibha Junior College

2021 – 2023

Percentage: 93.1%

Certifications

- Generative AI Foundations — GANs, Diffusion Models, Neural Networks
- Front End Web Development — Edunet Foundation
- Foundations of Prompt Engineering — AWS

Achievements

- Solved 300+ DSA and Java problems on [CodeChef](#) and 100+ on [GeeksforGeeks](#), covering arrays, recursion, trees, and dynamic programming.
- Advanced to Level 2 of Flipkart Grid 7.0, selected among thousands of participants nationwide; also participated in Flipkart Runway Season 5.
- Solved 7+ interview-style algorithmic problems on [LeetCode](#).
